

[Green Living at Fairglen - Houses for Sale in Hayle](#)

Fairglen is an exclusive development of state-of-the-art family eco homes for sale in Hayle. Situated in a former south-facing nursery just off the coastal road to the beach in Hayle, it is amongst the largest energy efficient new communities in the area. Phase 2 of these houses in Hayle is shortly to be presented to planners which will be followed by a formal application and the construction process is now anticipated during 2012.

Energy consumption is minimized by the use of a combination of:

- hot water and under-floor heating generated by heat pumps
- heat recovery ventilation systems
- options of banks of photo voltaic (PV) cells generating electricity, the surplus of which is sold back to the grid
- exceptional levels of insulation and passive solar gain, within a truly innovative design
- water bills are dramatically reduced through rainwater harvesting

Rainwater harvesting is where surface water is directed to a holding tank servicing bathroom and laundry facilities. All these innovations give low energy consumption which is good for the environment and your cost of living.

Contemporary materials and finishes help to make each home feel light, bright and spacious. South-facing skylights compliment large double-glazed windows and doors. Each house has the option of a woodburner, a choice of stylish bathrooms and thoughtfully designed kitchens. On selected plots conservatories lead to an enclosed south facing garden with outdoor storage options. Each home will have two dedicated parking spaces in addition to communal visitor parking throughout the development.

Antipated Prices from £250,000
